## ABSTRACT

The Whale Exploder Ecosystem (WHEXcosystem) consists of 1 DeFi token, a set of 4,800 NFTs and a DAO vote token. Our mission is to save the whales one transaction at a time. We envision a world where cryptocurrency and NFTs will have a net positive impact on the environment.

Whale Exploder (\$WHEX) is the start of the Whale Exploder ecosystem. Created June 19, 2021, it is a DeFi token on the Binance Smart Chain. A portion of the transaction fees get donated to Whale Conservation charities.

WHEXy Whales are a 4,800 NFT collection on the Ethereum (ETH) blockchain. Created April 29, 2022 initially on polygon, and since migrated to Ethereum. They function as both a Profile Pic collection and as a way to generate income from mint proceeds and royalties for Whale Conservation charities. They also provide a way for holders to win WHEX. Additionally, the distribution of DAO vote tokens is tied to these 4800 NFTs.

The WHEXcosystem DAO (\$WHEXDAO) token was created May 12, 2022. It is used to make decisions on the future of the WHEXcosystem via blockchain vote. Each round of voting, each WHEXy Whale is airdropped 1 voting token

## VISION

Our vision is that one day, cryptocurrency and NFTs will have a net positive impact on the environment.

## MISSION

Our mission is to save the whales one transaction at a time. We do this through our BSC token Whale Exploder, NFTs, the WHEXy whales and partnering with other projects that focus on important environmental causes.

## ABOUT THE FOUNDER

Peter Wake is a Mining Engineering graduate (2020) working full time in IT/Business Development at a construction company in Ottawa, Canada.

In early 2021, Peter got into putting real money into cryptocurrency, starting with Dogecoin and some DeFi projects. He had been casually watching the market after having getting some free Doge in 2016 from a faucet.

In March 2021, Peter made his first NFT on OpenSea and in June 2021 launched the Whale Exploder token on the Binance Smart Chain.

## WHALE EXPLODER TOKEN (\$WHEX)

Whale Exploder (\$WHEX) is the start of the Whale Exploder ecosystem. Created June 19, 2021, it is a DeFi token on the Binance Smart Chain. A portion of the transaction fees get donated to Whale Conservation charities.

## WHALE EXPLODER ECOSYSTEM DAO (\$WHEXDAO)

The WHEXcosystem DAO (\$WHEXDAO) token was created May 12, 2022. It is used to make decisions on the future of the WHEXcosystem via blockchain vote. Each round of voting, each WHEXy Whale is airdropped 1 voting token.

Network: Binance Smart Chain

Contract Address: 0x1fFD93F8c3d99bDAA4A012A0Fc26868F00Cfa5c2

Initial Supply: 1,000,000,000

Stockpile Address: 0x0D7079098C8feb4F4AEF40703CE83eCc704f371d

### VOTING MECHANISM

A voting cycle is initiated by Peter Wake, or by a WHEXDAO holder sending 1 BNB to the Stockpile address. This gives holders the power to create their own votes for the DAO, and covers time and expenses of sending out the new tokens, as well as discouraging frivolous votes to get more WHEXDAO in circulation.

WHEXDAO tokens are sent out from the Stockpile to holders of WHEXy Whales at a rate of 1 WHEXDAO per 1 WHEXy Whale.

Peter Wake will then publish a question in Discord, Twitter and telegram and provide directions on what address to send WHEXDAO tokens to for each option.

The voting period will end 42 hours after the vote goes live. All WHEXDAO tokens held by the vote option. addresses will be sent back to the stockpile.

The decision will be carried out by the WHEXcosystem team. (Must have at least 51% of the total WHEXDAO used to vote).

Note As CEO, Peter Wake retains the right to veto any decision, or decide not to run a vote on a question presented by the community. I.E. you cannot use the DAO to perform a hostile takeover of the WHEX contract, decide to perform illegal acts, etc.
